

HOW TO MEASURE YOUR RING SIZE

Use the ring size chart below to determine your ring size. To ensure the ideal fit, our experts are available to assist you. For more guidance, visit asaroga.com/articles/size-guide.

If the width of a credit card fits inside this outline, your print scale is correct.

Measure Using a Ring You Already Own

1. Print the guide at 100% scale, ensuring the page is not resized or scaled.
2. Place a ring you already own over the circles provided.
3. Find the circle that most closely aligns with the inside edge of your ring. The measurement shown represents the ring's inner diameter.
4. If your ring falls between two sizes, we recommend selecting the larger size.

Wider bands may fit more snugly on the finger. For a more comfortable fit, consider selecting a half size larger.

Free Resizing

Complimentary resizing is available during the first year, subject to the sizing tolerances of each piece. Our diamond and jewelry experts are available to assist with resizing or any questions you may have.
